BCS and SharePoint

BCS now has the option to integrate with Microsoft SharePoint.

With most businesses now running Microsoft 365 (previously Office) you can now move away from Dropbox and integrate your document storage & backups with SharePoint.

With the equivalent functionality of the BCS/Dropbox integration, you can confidently sync all of your documents from BCS into your own SharePoint repository.

Available as an "add-on", the BCS SharePoint integration is a must for any business.

FEATURES

- Offers a centralized location for storing, organizing, and sharing documents, making it easier to manage and access files.
- Enables team collaboration with features like co-authoring, version control, and shared workspaces, enhancing productivity and teamwork.
- Seamless integration with Microsoft Office applications (Word, Excel, PowerPoint, etc.) enhances productivity and ease of use
- Provides strong security measures, including access control, data encryption, and compliance with regulatory standards, ensuring data protection.

- Easily scalable to accommodate the needs of small teams to large enterprises, supporting growth and changing business requirements.
- Offers mobile apps and responsive design, allowing users to access SharePoint sites and content from any device, anywhere.
- Can reduce IT costs by consolidating various tools and services into one integrated platform
- Regular updates and support from Microsoft ensure the platform remains secure and up-to-date with the latest features and improvements.
